

## **25 QUESTIONS FOR HEALTHCARE PROFESSIONALS**

1. Does a virus develop inside or outside of the human body?
2. Can protein be infectious?
3. Do the rising rates of dementia have any correlation to misfolded proteins and subsequent prion disease?
4. Where can I find safety studies on manufactured nanomaterials and nanotechnology?
5. How much nanomaterial is produced, by country, each year?
6. How is the nanomaterial industry regulated?
7. What is protein corona?
8. What is the corona metabolite?
9. Do healthcare professionals have an understanding as to why metabolic disorders are skyrocketing?
10. Are genetically modified organisms safe and where can I find studies of evidence?
11. What is aspergillus and how is it used in the food and pharmaceutical industry?
12. Where can I learn more about the emergence of black fungus in the human body?
13. Can mold become rapidly invasive?
14. How do I understand what biofilm is and how to treat it?
15. What is bacterial quorum sensing and can it potentially affect me or my loved ones?
16. If it's estimated that 90-95% of humans are infected with proteins from a condition known as Epstein-Barr Virus, can it be safely assumed that a relatively high rate of co-infections are occurring within those who become infected with SARS-CoV-2 proteins?
17. What is luciferase and how is it being used in the medical industry?
18. Will a neural-interface be required in order to access state funded healthcare services in the future?
19. Where can I learn more about Morgellons Disease?

20. Glycine is a fundamental building block of the human body. I've heard that glyphosate mimics glycerine. Is this true?
21. What role does public fluoridation play in the oral health crisis in Canada at this time?
22. Many products containing fluoride indicate that fluoride is not safe to swallow. Where can I find guidelines about the efficacy and long-term safety of fluoride?
23. Can internet frequencies potentially impact my oxygen levels or adversely affect me in any other way?
24. What role does Canada play with the Human Genome Project?
25. Where can I find more information about:
  - Microzyma
  - Pleomorphism
  - Archaea
  - gram positive - gram negative bacteria
  - Mycobacterium
