NOTICE OF GOVERNMENT OPPRESSION AND SUBSEQUENT HARM

TO ALL ADDRESSED PARTIES:

Let it be known that I've experienced incredible oppression for blowing the whistle on the criminal activities of the now defunct Prince Edward County Children's Aid Society (PECAS). My quality of life was obliterated by a network of Children's Aid Society (CAS) apologists at all levels of government in Canada years ago while oppression and the effects thereof remain prominent in my life today.

Upon review of my personal records, it becomes evident that several individuals working from within the so-called government of Canada at municipal, provincial and federal levels and also from within the judiciary and public service sector in Ontario were historically involved in oppression campaigns directed at either me or my loved ones.

https://www.holisticusinternational.ca/_files/ugd/1c170a_f8d26bb44a424e7f840d9a0ad6a7e0d2.pdf

Several agents within the so-called government, judiciary and public service sector belong to

the masonic fraternity or some other clandestine order not accountable to the people of Canada. Freemasonry obviously influences its members while many of those members are themselves so-called government, judicial or public service sector employees. In this way, I fail to see how freemasonry isn't understood by others to be a direct influence on particular government agents. It's not just freemasonry either; there are several clandestine brotherhoods active within the so-called government, judiciary, military and public service sector today.

https://www.holisticusinternational.ca/_files/ugd/1c170a_6d4867d992a0440d8192f3bb93944cb0.pdf

Take the Orange Order, for example; a group notorious for its bold Loyalist stance and subsequent brutal campaigns in Ireland and other countries. The Orange Order was sanctioned to operate in Canada since, at least, the period of time surrounding the Jesuit Estates Act that was debated between John A. Macdonald and Dalton McCarthy in Canada's House of Commons. In that particular debate between Macdonald and McCarthy, a deep schism within the Conservative party is revealed along with the fact that religious issues drive the divide between respective political parties in Canada.

Freemasonry, the Orange Order and other fraternal groups, despite false claims otherwise, are fundamentally religiously driven and connected to many churches and charities in Canada today. I know, firsthand, that freemasonry was associated with the church that I was once a member and employee of. Conflict between myself and the minister of the church arose when the minister began a program called Reaching for Rainbows. The program for young females appeared to me to be a stepping stone to the International Order of the Rainbow program, associated with Freemasonry, for older females.

I felt that the Reaching for Rainbows (R4R) program generated inequity and disadvantage to boys and it was also being developed in association with the CAS so I refused to support it. At the same time, I knew that children in local foster homes were being sexually abused and the minister was not willing to help me expose that matter. The minister and I became diametrically opposed at that point.

<https://tomorrowmatterstoday.blogspot.com/2016/12/persecuted-by-my-church-oppressed-by-my.html>

I was eventually kicked out of the church. My children and I were alienated from the church and

wider community at that time. In return, I filed a human rights application against the minister with the Human Rights Tribunal of Ontario (HRTO). I submitted a notice of corrupted proceedings to the Registrar of the HRTO but the HRTO failed to respond to the notice and eventually dismissed the case.

Contrary to human rights legislation, the HRTO has blocked my right to remedy and subsequently began gate-keeping the unlawful actions of individuals who outright oppress me. The HRTO continues to thwart fair access to so-called swift justice and subsequent equitable remedy for me here in Ontario, Canada.

In return for advocating for children, youth and families who were oppressed by so-called child protection workers and for subsequently blowing the whistle on the crimes of the PECAS, I evidently set myself up for a lifetime of serious oppression from my so-called government and its various agents. Intolerable, serious oppression has been a mainstay in my life since that time.

At present, bad faith actors working within the Ontario Disability Support Program (ODSP) effectively caused intentional harm to me by arbitrarily suspending my income support in January 2023. The matter was adjudicated, albeit not to my satisfaction, by the Social Benefits Tribunal (SBT). Still, however, the SBT issued an order in September 2023 for the ODSP director to provide me with specific evidence within 30 days. The documents would clearly determine if the ODSP director was acting in good faith when issuing a decision to suspend my income support and subsequently verify that the director followed the rules when acting against me in tribunal proceedings. To date, neither document has been supplied to me and I highly doubt those documents ever existed in the first place.

ODSP employees, who know or ought to know better, are the problem here! I'm receiving undeniable and exceptional differential treatment while being forced to operate in an established long-term toxic environment. The subsequent discrimination and harassment that I continue to experience is psychologically disturbing, emotionally painful and physically exhausting!

It's utterly absurd that, due to my *special circumstances*, I continue to receive approximately \$500.00/mo less than anyone else in my situation would receive. I've been intentionally thrust into extraordinary circumstances by ODSP workers and subsequently left to rot, literally, in deep poverty! While I understand that particular ODSP workers may not like me as a person, I simply can't come to terms with how anyone, especially those with the means to provide available remedy, could treat another human being in the way that some of these ODSP workers have treated me and other ODSP clients. The consistent manner in which I've been so thoroughly disregarded by ODSP workers is beyond morally void.

https://www.holisticusinternational.ca/files/ugd/f57efd_a3ac9b0ffa044a2db301f0533da1920b.pdf

When attending an emergency meeting last week with the ODSP regional manager, Shurelle Alcindor, I was informed that I'd hear back by February 16, 2024 with regard to my insistent request for imperative, emergency assistance. The assistance that I requested was for essential items that are imperative to my well-being. When Shurelle Alcindor attempted to tell me that no funds were available to facilitate my request I clearly explained that funds for special circumstances are most certainly available and that there is a duty to provide such to me at this time. Shurelle Alcindor stared at me for a moment before saying "fair enough." Although I'm not surprised, I am disappointed that I haven't heard back from Shurelle Alcindor as I remain in peril.

It was Shurelle Alcindor who subsequently explained to me that ODSP wasn't able to provide me with the SBT-ordered documents. Those particular documents would have clearly established that ODSP staff were acting in good faith in the execution of ODSP policy that adversely affected me. In the absence of those documents however, bad faith becomes clearly established while various workers not only continue to cause serious, irreparable harm in my life but fail to deliver available support to overcome the extraordinary circumstances that I find myself in. I've directly appealed to Shurelle Alcindor for basic human decency which Shurelle Alcindor, for whatever reason(s) adamantly denies to me.

All the while, the Prince Edward County (PEC) Building Department has condemned my house while subsequently refusing to respond to any and all written submissions. The land taxes for that property were paid in full up until the point of PEC's most recent assault against my liberty. I justifiably refuse to pay land taxes until the matter is fairly resolved. Once resolved, tax reform in general is required! I'm through funding my own tyranny through taxes! At any rate, the Mayor and municipal councilors and Police Services Board refuse to respond to imperative correspondence.

The attack from the PEC municipal government occurred while key-players in the so-called system were aware that I was in extreme crisis due to the so-called pandemic coinciding with exceptional family dysfunction and failing health of my own in an already unstable situation. At that time, I was also dealing with a situation where upon coming into my care a child in need of protection was vindictively refused service by so-called child protection worker, Michael Evans, on behalf of the Highland Shores Children's Aid Society (HSCAS).

Although the HSCAS left the child in my care when deciding to close the file, ODSP failed to provide any extra support to me for the child. In return for the outright discrimination by HSCAS, based on unconventional family status and subsequent disability, I filed an application with the HRTO within the one year application deadline.

https://www.holisticusinternational.ca/_files/ugd/1c170a_d713bb66aa2f4db39d9b0d3513cdc6c4.pdf

Denise Ghanam, a so-called equity, diversion and inclusion expert, recently adjudicated the case I filed against the HSCAS. According to the cases that I've reviewed on Canlii, Ghanam is

blocking an alarming amount of cases from being heard at the HRTO. Ghanam claims that a ridiculous number of applications have no jurisdiction which, from my perspective, no reasonable mind could possibly support! Ghanam, in many cases, places unreasonable, untimely demands on the applicant before ultimately dismissing the application in the end.

https://www.holisticusinternational.ca/files/ugd/f57efd_217f1e95881947339d0dd3651ee407be.pdf
https://www.holisticusinternational.ca/files/ugd/1c170a_d6940bd2de83426faa2ca13f04378d2b.pdf

Ghanam doesn't seem to follow rules of procedure or the rule of law for that matter and is, from my perspective, abusing the HRTO process from my perspective. Ghanam, appearing to be a part of the 2015 Conservative Party patronage appointments and further appointed to the HRTO by Order-in-Council, giving me the appearance that Ghanam wasn't, in any way, working in good faith to uphold any actual form of justice, especially for myself, but otherwise protecting colleagues in an undeniable colonial so-called system.

https://www.holisticusinternational.ca/files/ugd/1c170a_939776b153284c9ab8e88313a796c5a2.pdf
https://www.holisticusinternational.ca/files/ugd/f57efd_5c594290d2e2473da1ac9e1db85bfdcf.pdf

Had Denise Ghanam followed the HRTO rules, fairly adjudicated my HRTO matter or even attempted to afford me a shred of dignity, perhaps I wouldn't have been compelled to research that individual's personal history in Windsor, Ontario. I hope Ghanam is happy in knowing that she has opened a can of worms, so to speak, for the so-called equity, diversity and inclusion crew in Windsor. Ghanam has, in my opinion, potentially exposed several colleagues in what I perceive to be ongoing colonialism in Canada which will be reported to appropriate so-called international authorities.

https://www.holisticusinternational.ca/files/ugd/f57efd_3e8ed4b7b43a401b95cdd018fe8e03b5.pdf

https://www.holisticusinternational.ca/files/ugd/f57efd_c9531a21d15d44e2a8327780128a7d94.pdf

Another case that I filed at least half a decade ago with the HRTO was recently adjudicated by Holly Gomes. I haven't had the time to look into the history of this particular individual but, again, appointments by the Lieutenant governor are beyond questionable to me at this point. The very fact that this particular case and most recent decision from the HRTO took such an absurd amount of time and nonsense to achieve a final decision is telling in itself! I'll get around to researching Holly Gomes' professional history in time which is likely to prove interesting, to say the least. It appears to me that there was some coordination within the HRTO as to the timing of two recent so-called decisions.

https://www.holisticusinternational.ca/files/ugd/f57efd_5d51a9b55a14494190222e76cc642904.pdf

Nevertheless, the HRTO Registrar was previously made aware of my grievances after an unresolved complaint was submitted by myself to the HRTO. The Registrar didn't respond to my submissions which, in my experience, is nothing new from the so-called professionals in Ontario. Again, not responding when there's a duty to do such is an established act of negligence. At any rate, the HRTO appears to be attempting to make me feel alienated and subsequently defeated; a common tactic that oppressors use in my experience to make vulnerable people lose hope and to give up on pursuing accountability measures.

https://www.holisticusinternational.ca/files/ugd/f57efd_9fa99e4669b24826bd68aa1fc01d3e84.pdf

On the contrary, however, the evidence being generated by my various oppressors at this time is giving me more hope than ever that others will now see what I see with the corruption in Canada while subsequently arming me with an arsenal of evidence for civil litigation.

So, while I had hoped for the best with HRTO proceedings, I was definitely prepared for the worst. I simply played the hand that HRTO dealt to me, knowing that monetary awards and actual justice were far more attainable if and when I was able to effectively establish that particular individuals were acting against me in the absence of good faith. Let me be clear when saying that monetary awards have never been my primary motivation in seeking accountability and justice here in Canada!

With that said, I'll certainly take any monetary awards that come to me in return. I've come to learn that while a stacked bank account and high society living means very little to me, it means everything and more to my oppressors. As such, if I have to drain bank accounts and confiscate assets as a form of remedy at this point, then so be it!

While individuals *acting* in a professional capacity, subsequently executing professional duty in good faith are shielded from legal liability, the law does not shield actors of bad faith regardless of the capacity they act in. If and when so-called professionals abandon good faith in the execution of their so-called duties, they expose themselves to the serious risk of personal liability. The HRTO and some of its members, according to the evidence, have established themselves as actors of bad faith whom lawful remedy shall find through due course.

While particular bad-faith actors have worked, seemingly in pathetic desperation, to thwart my voice, those bad-faith characters have, in all actuality, provided the final pieces of evidence that I required to prove beyond doubt that there is no justice in Canada and that any alleged avenues to the illusion of justice are as corrupt as water is wet! Integrity is undeniably compromised when court and tribunal staff are appointed by and subsequently accountable to the deceptive so-called executive government that usurped the constitution of Canada in the first place!

It's become evident, to me at least, that Ontario's social justice tribunals, much like the so-called courts of justice, were designed to protect key-players within the colonial so-called government and the respective so-called system of nobility over the people of Canada despite how aligned with so-called justice these systems appear to be. With confidence lost and trust in the traditional system therefore abandoned, I'm left with no choice but to sue individuals who've acted in bad faith against me as well as the HRTO itself. I'll keep putting cases through the courts and tribunals until every last corrupt agent is removed and a process of actual justice is implemented here in Canada!

When the CAS stole my children in 2000, my father told me to bide my time while providing my oppressors with enough rope for them to metaphorically hang themselves. Eventually, the

PECAS eventually did just and so will the rest of my oppressors. It's simply the nature of things; what goes up, must come down! So, while it's taken me nearly a quarter of a century of enduring relentless, horrific oppression, I believe, by the grace of God almighty, that my mission to evidently expose systematic corruption in Canada has been finally achieved!

After everything I've endured because of entitled colonialists in this country, I can't, especially in good conscience, let what happened to me occur to others. Now that I have a decent understanding of how the outrageous corruption is operating in Canada and throughout the world for that matter, I won't - can't - rest until future generations are protected from what appears to be an insane so-called global government. I'll be doing all that I can from hereon to resist globalism and ongoing, unlawful colonialism in Canada!

I literally must, however possible, continue to rage against the colonial machine, so to speak. The assaults against myself, my loved ones and what little we have left in life never seem to stop. Last year Gerry Maxwell contacted me to ask if Power Concrete, a neighbouring business to my property, could erect a sound barrier type of fence on my property. I agreed to meet with Gerry to discuss the matter. Instead of meeting with me or speaking with me any further, I've been informed that heavy machinery has allegedly been on my property and that the property has been excavated. I can't possibly know for myself while I remain seriously incapacitated.

I'm currently attempting to get myself into a position where I can deal with my property matters next. I have to make travel arrangements to get over to my property to find out, for myself, what the heck is going on! At present my car requires repair after a mechanic in the PEC community disabled me even further by putting my car into a worse mechanical state than when I took it to him. I've learned in the hardest ways possible that I can't trust service providers, especially in PEC, in the absence of a solid, personal connection. Even then, accountability is often difficult to be had or even outright unattainable due to the hive-minded community in PEC that protects one another at, seemingly, all cost!

Until something changes in my life, things simply are what they are. My car awaits the funds for repair while I currently have very little food in my home to get by on. I'm already significantly underweight with declining health and I'm now having exceptional difficulty keeping my phone and internet services which are my last resources to any connection to the outside world. My surreal situation forces me to live on far more credit than I've ever been prepared to and I'm almost at the end of the line here. To say that I'm incapacitated is literally an understatement at this point; nearly eliminated is far more realistic!

At this time, It appears to me that the so-called elite cliché in PEC and other municipalities in Canada collude to set the community trends and standards that they collectively desire. These entitled collectives appear to orchestrate so-called studies that will justify their collective desire and then delegate particular individuals in the community to nonchalantly *suggest* the ideals of that particular collective to the wider community. I've noticed what appears to be a similar trend when researching other areas like Windsor, Ontario. In my experience, those opposed to or otherwise not in-line with the agenda of the entitled collective are often treated poorly and

subsequently alienated away from group discussions. One can directly witness this hive-minded gate-keeping behaviour in several various online so-called community forums. In this way, from my perspective, ongoing colonialism and the resulting harm and subsequent trauma remains evident in PEC, Windsor and many other communities throughout Canada to this day!

Due to significant generational trauma and subsequent masonic scorn, I've been abandoned by much of my family. This fact complicates many of the already severely convoluted, ongoing issues that I experience in that Loyalist community. I speak further to the matter of ongoing colonialism in Canada and the subsequent urgent case for decolonization under separate cover in an accompanying submission.

Contrary to what my oppressors would have others believe about me, I'm certainly not unbalanced enough to suggest that every instance of adversity or disadvantage in my life arises from oppression. The so-called system, however, has become so dysfunctional that it's nearly impossible at this point to make any distinction between systematic dysfunction and outright oppression. When bad-faith actors aren't at play in my affairs, systematic dysfunction of some intolerable sort, in far too many instances, most certainly is! Negligence in itself, intended or not, is oppressive! The excuse of a broken system is so old and intolerable. The system wouldn't be broken if individuals who sustain from it consistently governed themselves with actual integrity!

Unfortunately, integrity is just a word to many people in PEC where a network of individuals colluded to successfully kill off my grandfather and to subsequently alienate me from my grandmother. Thereafter, my father's only sibling, with the assistance of a lawyer, robbed my father of his previously arranged for inheritance while my father and I were subsequently being effectively alienated from the community and other family members.

<https://drive.google.com/drive/folders/1LnDMe2kPGARjJrm2AWHcwtnOZnmDZDQ>

<https://docs.google.com/document/d/1boZ-qWtfAGcUOMwhp1suRep2Yo8s3qFZ5kOI4fRzpZU/edit>

My grandparent's home was then sold which affected my lifetime access to shared amenities (water, driveway access, laundry facilities, shower, etc.) up until that point. I've come to learn that inheritance for some families is a control mechanism for those who don't keep in step with colonial rhythm. So-called professionals in my hometown, province and country have nearly decimated my entire life and everything I ever worked to build or otherwise acquire and that of my family. Again, things just are what they are! I can only trust that the universe is unfolding just as it should and that my matters will resolve, one way or another, in due time.

Once my grandfather was eliminated, my grandmother was alienated away from my side of the family with my aunt free to orchestrate a community campaign against me. I was forced to live thereafter in exceptionally substandard conditions with no running water, no electricity and no means to improve my situation because of my ongoing crisis situation, subsequent failing health and severe community oppression. Many people in the community were aware of my terrible situation but instead of helping me in any way, many of those people either joined in the oppression campaign against me or simply looked the other way while my entire life fell apart.

https://www.holisticusinternational.ca/files/ugd/1c170a_d39ad6dc08a0437c99af2218e75ee2b3.pdf

All the while, the Picton OPP were literally acting as personal bodyguards for various individuals who were outright oppressing me. I initiated several so-called formal complaint processes against several so-called professionals only to find out for myself that corrupt agents are gate-keeping any actual possible remedy for those considered to be outside of the so-called system in Canada. The Office of the Independent Review Director was brought in on the matter whereby allegations of professional collusion, elder abuse and fraud were ordered to be investigated but alas, the so-called professionals rarely play fair, and to my knowledge, a proper investigation has never occurred in response to my initial allegations.

The former and current so-called mayors of PEC avoid me altogether despite my direct pleas to them for assistance. The only times municipal staff tend to deal with me is to harass me for frivolous matters, time and again, making threats to levy unjustifiable fines or to take or otherwise control the property while doing so! I was forced to move out of my home in 2019, due to my unresolvable crisis living conditions, failing health and no significant support. I've experienced crisis after crisis and significant oppression at the same time since then.

It's not like the average lawyer or paralegal can fix my troubles or even begin to assist in doing so with the way things currently stand here in Canada. Those who swear loyalty to the so-called king are not accountable to me or to the people of Canada but to the so-called king and, seemingly, the so-called powers behind the crown. With the exception of one amazing criminal defense lawyer, Ontario lawyers usually treat me with utter disdain the moment they understand my opposition to their treasured Crown. Many lawyers, in my experience, are pro-system whether they understand how that system actually operates or not.

Meanwhile, my doctor has abandoned my care after discriminating against me and refusing to take long-term health concerns seriously. There's far too much to say in the matter of the exceptional medical tyranny for the purpose of this particular document. Let's just say that far too many so-called healthcare professionals in Canada subject themselves to personal liability by arbitrarily eroding the rights of their patients.

Still, a day is quickly approaching where so-called public officials, public servants and service providers alike will be held to account by the people of Canada for, among a multitude of other matters, the COVID-associated pathogenic fungal healthcare crisis that continues to unfold while so-called government and public health officials appear to be drop the ball, so to speak, on an efficient, effective response. The general public hears about these new so-called COVID-associated illnesses while most so-called public health officials fail to clarify matters for the general public in Canada. In this way, I have to call it for what it is in my informed opinion - A CRIME AGAINST HUMANITY!

https://www.holisticusinternational.ca/_files/ugd/f57efd_aa981ac4bc8440319668542fac2dac13.pdf

At the same time, oral health issues, cancer and other mutations, addictions and mental health issues, among so many other issues, are spiralling out of control. I've attempted to correspond with Canada's so-called health authorities asking to be informed about matters revolving around

nanotechnology, genetic modification, radiation, Covid-associated pulmonary aspergillosis, the so-called human genome project, immunity, virus definition, among, what I consider to be, other critically important topics, while I get no response, whatsoever, from these so-called authorities.

On a completely different but equally important note, there's a massive, albeit currently stifled, community of people in Canada who justifiably demand outstanding justice for the legal theft and subsequent harm of their children by Canada's so-called child protection system. Scores of survivors from the so-called foster care system stand in their own unbearable truth about the so-called system, subsequently poised to avenge unspeakable crimes against their person, families, dignity and basic right to life, liberty and security!

Canada ought to be thoroughly ashamed of the state of its so-called child welfare systems. At present, there are scores of children living out of motels here in Ontario. To simply say that far too many children and youth die in the so-called system is an incredibly gross understatement while an inexcusable number of those who don't perish go on to suffer some form of abuse. Abused children and youth subsequently go on, again in far too many instances, to have an unjustifiably poor long-term quality of life; inevitably at risk of a shortened life-span. Generally speaking, an unfathomable amount of lives have been destroyed by the legally sanctioned child-trafficking system in Canada.

The so-called child protection system is sick, twisted and unjustifiably unaccountable. So-called child protection agencies cause severe harm and subsequent social disadvantage for far too many people in Canada, especially vulnerable children and youth! The facts of the matter are intolerable! It's time for the people of Canada - not the colonial so-called government who designed it in the first place - to restructure child welfare services in Canada - NOW!

I've certainly done my part in calling for child welfare reform in Canada. With the experience that I've gained in doing so, it's become clear to me that particular so-called officials who can actually bring about change in the so-called system continuously fail to do so.

The former Registrar of the Ontario College of Social Workers and Social Services Workers (OCSWSSW), Lise Betteridge, for example, issued an open letter citing serious concerns about the practice of unlawful social work by CAS employees in Ontario but then, for whatever reason, subsequently declined to exercise the full powers of the Ontario Social Worker and Social Services Worker Act that clearly enables the OCSWSSW to fulfill its threefold mandate to:

- protect public interest;
- govern its members;
- regulate the practice of social work in Ontario.

I wrote to the new OCSWSSW registrar, Denitha Breau, insisting that urgent measures be taken to regulate the practice of social work. I indicated to the registrar that there would be an appearance of wanton negligence and intent to cause intentional emotional distress to a large demographic in Ontario if immediate steps weren't taken to regulate the practice of social work and to protect public interest. I further indicated that I planned to sue the Registrar in a personal capacity if unregistered social work in Ontario wasn't effectively quelled. The registrar responded stating that although my concerns are valid, no intention is had by the registrar to regulate the unlawful practice of social work in Ontario.

Denitha Breau has the evident ability to petition the Ontario Legislative Assembly for amendments to the Ontario SWSSW Act as was clearly demonstrated on January 11, 2024 when the standing committee on Finance and Economic Affairs was addressed with regard to the proposed amendment of section 50 of said current legislation. As such, it appears that the OCSWSSW registrar has demonstrated a wilful, wanton act of negligence; thus establishing, as far as I'm concerned, mala fides which, in no way, affords protection from the law!

There's been this grand delusion in Canada that regulated professionals, public servants and so-called authorities can't be sued while *acting* in a so-called professional capacity. The reality is that anyone can be sued in a personal capacity for harm they cause to others. This includes several of the so-called authorities that I've unsuccessfully attempted to communicate with over the years.

Good faith, again, is the key-word and the shield from legal liability for so-called professionals! An *act* committed in the absence of good faith becomes an act of bad faith whereby legal liability falls and rests upon the *actor*. A person is always in their own personal capacity even while presuming to be a so-called professional! The law, when administered by a genuine, uncorrupted court of equity and justice, in no way shields individuals or groups of individuals, in any capacity, who commit *acts* of bad faith.

Once average, ordinary people come to understand that civil remedy is available to them and that their oppressors are personally liable for harm caused to them and theirs, I believe it'll be all over, so to speak, for bad-faith *actors* here in Canada. Bad-faith *actors acting* in a so-called professional capacity are likely to think twice about the personal harm that they cause to others once civil remedy transfers their own personal funds and assets to those adversely affected while acting, in any capacity, in the absence of good faith.

Several bad-faith actors have caused irreparable harm in my life. In fact, I'm not entirely sure how I've survived so much oppression but what I've detailed herein only begins to speak to what I've been forced to endure here in Canada. I've had to go full circle, I suppose, to see the bigger

picture that I'm able to see now. Had I not experienced so much tyranny in my life I would've never been prompted to research the actual nature and structure of the powers behind the so-called Crown which led me to discovering the deceptive dual so-called government here in Canada. Perhaps everything does happen for a reason!

Still, it's been an extremely unjust fight just to remain alive, much less to have any real quality of life, especially given all that I've lost and been subject to because of various systematic oppression strategies employed against me by actors of bad faith working from within the so-called government, judiciary and public service sector.

As such, I'll be moving along with a business endeavour that seeks, in part, to assist the people of Ontario to enforce their inherent liberty and to subsequently sue bad-faith actors that have caused them harm. In this way, I'll be able to self-sustain while encouraging and assisting others who're just as sick of the unaccountable, entitled, so-called elite as I am!

Let there be no doubt that similar endeavours will become the norm throughout Ontario and the other provinces whereby all bad-faith actors at all levels of so-called government throughout Canada are removed from their seats of privilege, one by one by the people of Canada, and subsequently sued for all that they are and ever will be!

https://www.holisticusinternational.ca/files/ugd/1c170a_6fa5082083784b9787c61504309c64c1.pdf

My business will not be engaging with the so-called government while Canada maintains a corrupt status quo and that's just the way it is! I'll self-sustain just fine once I'm made whole again through civil remedy, sustaining thereafter by my own volition. To get to that point however, I need this government-monkey off my back which I'm attempting to shake off, once and for all, at this time!

For the record, I'm in no way suicidal nor am I terminally ill or otherwise ready to throw in the towel, so to speak. In fact, I plan on sticking around to witness the triumphant justice that'll unfold here in Canada once the collective people of Canada come to understand Canada's colonial history for what it actually is!

Fortunately for me, as miserable as personal incapacitation continues to be, I've found that civil law affords a benefit by providing for an extension to statute of limitations time-frames, especially if incapacitated occurs as the result of bad-faith actors working against me with unclean hands. In this way, as long as my oppressors hold me down in an inequitable, incapacitated state, the longer I have to sue them in a personal (not professional) capacity for various torts!

As matters continue to unfold here in Canada, I'm confident that those who act in the absence of integrity will find themselves being held accountable by the Canadian collective in due time.

In the meantime, I'll be reporting the colonial, constitution-usurping, so-called government here in Canada to the so-called international authorities.

While I understand that appealing to international so-called authorities may seem risky to some, after researching the history of several clandestine dynasties in the world today, I believe it's the next logical step to take in thoroughly exposing the bigger problem of globalism while following the rule of law to actual national sovereignty and subsequent international peace and justice. In time, all deceivers and deceptive agendas will be exposed for all the world to see.

I have no doubt, whatsoever, that many, if not all, of the so-called authorities on the world stage today are aligned with the tyranny that's unfolding in the world today. After researching the history of the so-called system of nobility it's become clear that particular lineages have colluded in attempts to eventually dominate a global government. The curtain is slowly but surely being pulled back on that particular ludibrium and it doesn't take a genius to see that religiously obsessed dynasties are attempting to reemerge as the mediaeval tyrants they once were.

While the odds may appear to be in favour of the executive government at this time whereby most of Canada's economy, infrastructure and defences are controlled by the said so-called government, the will of the people of Canada will overcome the grip of their oppressors at all costs. Despite the current gloom and doom situation here in Canada and throughout the world, believe it or not, hope is not lost nor will it ever be!

After being in the belly of the beast for so long, advocating for others who fell through the cracks of the so-called system along with me while I, myself, could barely survive, I feel rather justified to speak on behalf of the so-called *less-fortunate*. In doing so, hear me when I say that the last are about to become first while the first become last here in Canada and throughout the world! Despite how the current state of affairs *appears* to be here in Canada, the will of the people is, from my perspective, stronger now than ever!

In nearing conclusion, I'll just cut to the chase and say that there's no point, at least as far as I can tell, in the average person making an appeal for help or change to parliament, the so-called Prime Minister or provincial premiers for the tyranny that continues to unfold here in Canada. This nation is captured in all ways that matter and the Prime Minister himself has no evident intention of disclosing that fact to the nation. The so-called officials, even if they did want to expose the corruption in Canada, are bound by oath and NDA's. Beyond that, the Usher of the Black Rod keeps parliament in check, so to speak!

The so-called Crown system here in Canada is nothing more than a deceptive political distraction. The majority of public eyes are on the prime minister and premiers while the so-called *viceregal*, executive government clandestinely pulls the strings from the shadows.

So-called public officials and servants are morally and legally obligated to promptly and thoroughly inform the people of Canada about the actual nature and agenda of the so-called executive government here in Canada. The time has finally come for the so-called governor

general, lieutenant governors and the rest of the characters currently operating through the so-called executive government to be accountable to the people of Canada!

In closing, it mustn't be lost on the reader that I continue to experience severe oppression here in Canada. I expect someone within the so-called government to remedy the extraordinary circumstances that my own so-called government has forced me into! In the meantime, I'm compelled to report ongoing colonialism and those who perpetuate it here in Canada to so-called international authorities.

While correspondence that I've historically sent to so-called officials in Canada is usually acquiesced, my submissions rarely receive a response. As such, although requested, a response to this particular notice certainly isn't expected. Nevertheless and at any rate, the jig is up for the so-called executive government here in Canada!

Darkness be damned! Let truth prevail and liberty reign!

Firmly resolved,

Brenda Everall
