TO: HEALTH CANADA

The Crown in Canada is not the person Known as Queen Elizabeth II. The Crown Empire is an unauthorized, foreign entity of deception and terror, operating as a shadow government in Canada. Evidence against the Crown Empire can be found in long or short form at www.holisticusinternational.ca

Health Canada employees and agents are lawfully forbidden to engage with the Crown or its agents!.

As per the Public Service Code of Values and Ethics for federal employees of Canada and subsequent conflict of interest legislation and various sections of the Canadian Criminal Code, agents and/or employees of Health Canada who are simultaneously in obligation, especially by oath to the Crown Empire or agents of the Crown Empire, such as the Masonic fraternity, the Order of St. John or the various clandestine orders of the Roman Catholic Church and various European dynasties, such as the Sovereign Military Order of Malta, must immediately resign from their position of public service in

Canada. More information about the Crown Empire corruption in Canada can be found on my website.

Evidence indicates that the Crown Empire has, historically, controlled the mainstream academic study and professional practice of health sciences. Evidence further indicates that this is still occurring today and that those who control such are working through various health agencies and governments, worldwide.

It seems that the infamous Louis Pasteur was a willing pawn of the Crown Empire regime whereby he assisted in stifling intelligent scientists and physicians by plagiarizing their works and subsequently manipulating their established scientific facts to the advantage of the Crown Empire.

As a result, scientists and medical experts, to this day, have been relying on corrupted fundamental science that has brought us to the point that we're at today with this current, alleged pandemic.

Health Officials can't even effectively explain to the Canadian populace what a virus is because of how obscured the fundamental, scientific truth has been. Concepts of virology have been completely misrepresented by the alleged health experts, worldwide.

Health officials in Canada and around the world are feigning ignorance on the pathology of SARS-CoV2, yet, from my perspective, those alleged officials know, or ought to know, exactly what's going on with the alleged pandemic, especially in light of the incredibly well established theories and subsequent various applications of omics.

Omics applications are directly related to the development of mRNA vaccines. In fact, vaccinomics is a well understood medical application practiced by an elite sect of the worldwide medical community.

Virology theories have historically sought acceptance in the medical community, yet, those theories seem only to have become accepted by the wider mainstream medical community in the era that computers were developing and, themselves, becoming infected with viruses. This is not a coincidence, in my opinion.

Essentially, a virus develops inside of a human after being infected with toxic code (pathogen), just as it does in a computer. At the same time, Bill Gates is behind the 'antivirus' solution for both computers and humans. This is not a coincidence, either, from my perspective.

According to the evidence, the Covid-19 pandemic was staged and subsequently used as a means to inject toxins into the populace, by force, inline with a nefarious trans-human agenda whereby the populace is to be ushered into a digital, new world order.

It's not a joke or a conspiracy. The evidence is obvious and plain as day to those who aren't suffering from the mass cognitive dissonance that the majority of the populace is suffering from due to illness, stress, trauma and terror purported onto them by their own government.

Individuals in Canada who've, somehow, avoided total traumatization have been suspicious about some sort of nefarious plan behind this current, alleged pandemic, yet, were simply unable to comprehend the entirety of the situation at hand because, like I said, the fundamental science behind virology has been so manipulated and corrupted!

Many of the healthcare providers in Canada are completely misinformed and subsequently confused and, therefore; unable to provide effective, quality healthcare services to their patients because of the misconceptions surrounding virology and subsequent professional licensing control mechanisms. Obviously, this intolerable confusion and further thwarting of adequate patient care is occurring at the cost of the lives and livelihoods of the people of Canada.

I won't pretend to know exactly what's going on with the current pandemic and, although I am, admittedly, extremely skeptical about the intentions of Health Canada officials, I intend to refrain from speculation, at this time, about who's at fault or how the current healthcare crisis in Canada plays into a nefarious new world order agenda, even though we know that it does.

Blame won't save lives at this moment and, besides that, the people of Canada will determine what and who is to blame in due time, especially once community action campaigns unfold across the nation. .

The most pressing matter at this time is getting the mainstream, alternative and lay healthcare providers in Canada, and throughout the world, on the same page about what's actually occurring with the utter chaos that the Crown Empire regime unleashed onto the worldwide populace with this undeniably designed pandemic.

There can be no doubt that terrain theory plays a critical role in human health. That this science has been so stifled is, in itself, an incredible crime against humanity!

Additionally, microbiology and immunology are often unjustifiably overshadowed by weak and wonky concepts of virology that subsequently deny a full spectrum analysis of whatever SARS-CoV2 and resulting Covid-19 actually is and, therefore, stalling effective responses towards the infection and resulting disease.

Getting on the same page is even more important now that potential pathogens have, allegedly, been injected into the SARS-CoV2 vaccinated populace of Canada. Now, healthcare providers may, quite likely, have to respond, with urgency, to a genuine pandemic in the future.

As such, it's critically important for the people of Canada to ask imperative questions of their healthcare providers and alleged officials, for the sake of their own wellbeing and ultimate survival.

An equally critical measure is for the healthcare experts in Canada who do know what's going on with the healthcare crisis in Canada to come out of the shadows and into the light of public truth. Those who are able to come out from the system to provide grassroots services to individuals in respective communities across Canada are strongly encouraged to do so. I believe that we've reached a point where "if you build it, they will come."

Myself, and other people in Canada, are working towards community restoration campaigns. We will be taking our municipal governments back by removing corruption and restoring good government. Respective communities in Canada will, once again, thrive! Over time, the people will reclaim their hospitals and medical clinics and operate them effectively and efficiently to the benefit of the whole community.

In the meantime, grassroots responses may have to be enough. A handful of informed and committed healthcare professionals can, and will, make all the difference at this critical time. The people of Canada are experiencing an unprecedented healthcare crisis and it's up to the average person to save the day. No one but ourselves, and the grace of the Almighty, can save us, now.

I'm not generating fear or promoting public unrest, by any means. In fact, I believe that we have very little to fear if we all do our part in responding to the tyranny that's engulfed this nation and those who purport such! The power is in the numbers and the people of Canada are waking up to tyranny in troves. Once the people are properly informed about the tyranny in Canada and what/who's behind it, I have no doubt that they'll respond appropriately and accordingly.

The notions of chaos and social unrest are put onto us by our oppressors. The media fuels our fears that a revolution has to be violent and devastating. None of that is true, however! Natural, normal people have no desire or inclination for violence or social unrest. Natural human beings crave peace and order and that's exactly what they'll establish once the corruption is arrested, community by community, whereby good governance is implemented across Canada.

Sure, there's always the renegades and those who go against the grain, but they, too, will weed themselves out, in time, as communities stabilize and restore the genuine concepts and applications of justice and equity!

The scientific minds and healing hands of this nation must come together and brainstorm a way out of this looming healthcare crisis that we find ourselves in as a Canadian collective. Further information about community response initiatives can be found on the Holisticus International website..

Employees within Health Canada and other public health agencies in Canada are encouraged to break the pattern of government secrecy and to work with the people of Canada to restore good health in Canada. Public health officials and employees of good conscience must put it on the line at this point and stand up for the truth that will set us all free in the end. We're all in this together and we must all find ways to work together, when and wherever possible, to find answers to the difficult questions that press us, collectively, at this time.

Personally, my options for seeking medical advice were eliminated when my doctor refused to provide me with adequate care and eventually abandoned my care altogether, leaving me disabled and incapacitated in ways that prevent me from finding alternative care or advice.

Therefore, I'm asking the staff at Canadian public health agencies and professionals in the medical community at large to answer some of the questions that have developed on my end since I began to research what SARS-CoV2 really is, and isn't. I'm not submitting a FOI because the information that I seek from my allegedly transparent government should be publicly accessible.

I simply require assistance in accessing the particular information that I'm seeking through an allegedly free and open healthcare system. I am disabled and I'm requesting accommodation, under the human rights code, to have my requests met. I'll go ahead and ask the questions and Health Canada can, if necessary, provide procedural direction in a response, should there be one.

1. In 1993 an assessment of fluoride was carried out by Health Canada and Environment Canada whereby the summary statement reflected that: "In view of the small difference between the estimated daily intake of inorganic fluorides and the level at which adverse effects on the skeleton are anticipated, it is recommended that exposure of the population of Canada to inorganic fluorides continue to be closely monitored." What evidence regarding the safety of fluoride has Health Canada collected, through the close monitoring of fluoride, since 1993, and where is it available for public access?
2. We know that a healthy intestinal microbiota is essential to overall good health and the prevention of disease. What steps has Health Canada taken to inform treatment providers and patients alike about this critical information?
3. What role do polymers, known as glycans, respectively play in microbiota health, SARS-CoV2 infection and the development of Covid-19 ?
4. Can the SARS-CoV2 vaccine potentially induce VAIDS?
5. The Rockefeller's allegedly established themselves in the medical community in response to parasitosis. Parasite infection in North America, however, is allegedly worse than it has been, historically. What role do parasites play in:
 - a) Autoimmunity?
 - b) Protein control in the human biome?
 - c) SARS-CoV2 proteins?
 - d) General health and well-being
6. Does Health Canada address gene mutations when considering treatment for SARS-CoV2 infection or the resulting disease referred to as Covid-19?
7. What, exactly, is the difference, if any, between long covid and Covid-19 disease?
8. What are the Health Canada recommendations in response to dysregulated methylation processes in particular individuals?
9. Does nanotechnology in the human biome affect the methylation process?
10. Has nanotechnology and its various applications been tested for long-term biological and environmental safety?
11. Does nanotechnology play a role in:
 - a) The development or transfer of SARS-CoV-2 proteins and the resulting disease known as Covid-19?
 - b) Molecular changes in the human biome?
 - c) Methylation?
 - d) Oxidization?
 - e) Metabolic disorders?
 - f) Autoimmunity?
 - g) General health and wellbeing?

12. Some individuals who became infected with the SARS-CoV2 proteins experienced co-infections such as Epstein-Barr protein infection. Historically, some of the SARS-CoV2 co infections were contraindicated for vaccination. When SARS-CoV2 vaccine mandates were established in Canada, were coinfections and the resulting complications in people who have them considered by Health Canada?
13. Whole food, organic nutrition is critical to good health. What broad, consistent service announcements and subsequent consistent public services are available, as was the case with the plethora of mask mandate, lockdown, vaccination and social distancing information and services, to the general public in regard to understanding and accessing adequate nutrition?
14. We know that the consumption of alcohol can exacerbate the effects of poor health and resulting disease. What steps is Health Canada taking to limit or prevent the consumption of alcohol in response to the alleged pandemic?
15. What does Health Canada recommend in response to the issue of potential Vitamin D receptor dysfunction among the Canadian populace?
16. Is harm potentially caused to individuals who're taking vitamin D supplements while having a dysregulated vitamin D receptor?
17. Does Health Canada have any recommendations for bacterial biofilm and how to defeat it?
18. Is any sort of bacteriophage therapy an approved therapeutic practice in Canada?
19. How do ribosomes interact with SARS-CoV2 proteins?
20. What role do eukaryotic cells and organisms play in
 - a) General human health?
 - b) SARS-CoV2 infection?
 - c) Covid-19 disease?
21. We know that glycine is a fundamental building block of the human body. We further know that glyphosate mimics glycine. What do the Canadian health officials know about this process and its long-term effect on human development and subsequent general health?
22. What role do yeasts, such as Candida yeast, play in:
 - a) the transfer of SARS-CoV-2 proteins from human to human and the resulting disease known as Covid-19?
 - b) SARS-CoV2 coinfection(s)?
 - c) Autoimmunity?
 - d) General health and wellbeing?
23. What role do Herpes proteins play in:
 - a) the transfer of SARS-CoV-2 proteins from human to human and the resulting disease known as Covid-19?

- b) SARS-CoV2 coinfection(s)?
 - c) Autoimmunity?
 - d) General health and wellbeing?
24. Why and how does the protein corona develop?:
 25. What role does protein corona play a role in:
 - a) The transfer of Herpes or SARS-CoV-2 proteins?
 - b) SARS-CoV2 coinfection(s)?
 - c) Autoimmunity?
 - d) General human health and wellbeing?
 26. The protein corona is alleged to be programmable. To date, what biological features has the protein corona been successfully *programmed* with?
 27. What is the difference between a hard corona biomolecule and a soft corona?
 28. What is the corona metabolite?
 29. What caused the unprecedented corona metabolite to emerge in the human biome?
 30. Does the corona metabolite correlate, in any possible way, to the rise in metabolic disorders in Canada?
 31. How is enzymatic activity and amino acid sequencing affected by this unprecedented biomolecular emergence of the complete corona?
 32. How does the corona metabolite affect general human health and wellbeing?
 33. Pegylation (PEG) allegedly assists with deciding which epitopes are available for receptor binding and, therefore; nanoparticles for medical use are often pegylated before gene therapy applications. Is the pegylation process 100% effective 100% of the time?
 34. Does the human body develop antibodies in response to PEG?
 35. So-called long Covid shares similarities with AIDS and Epstein-Barr proteins which, themselves, are alleged to be varied Herpes proteins. Those same proteins are very similar to those of Lyme disease, Morgellons, malaria, etc. What is the fundamental correlation between these varying but similar proteins?
 36. Monkeypox is now presenting as another potential health scare. We know that the world smallpox vaccination program called for the eradication of smallpox through use of what's referred to as the Vaccinia virus vaccine (VACV). Do proteins in the smallpox vaccination have any correlation to the current monkeypox outbreak?
 37. We know that the vaccination to eradicate polio actually caused an outbreak of vaccine-induced polio to occur. What are the current transmission rates of both wild and vaccine-induced polio in Canada and worldwide?
 38. What is the difference between new world and old world proteins/viruses?
 39. We know that the sPLA2-IIA enzyme activity was increased in many patients who allegedly died of Covid-19. Does this particular enzyme play a role in response to

protein corona or its resulting metabolite? If sPLA2-IIA isn't correlated to the complete corona or any of its components, what is responsible for such the increase in sPLA2-IIA in critically ill Covid-19 patients?

40. sPLA2-IIA is said to be an indicator for bacterial sepsis syndrome. Is there a sepsis element to SARS-CoV2?
41. What role do eicosanoids and eicosanoid metabolism play with SARS-CoV2 infection?
42. Is it TMPRSS2 or Cathepsin L that is considered to be the protease allowing cell entry for SARS-CoV2 virions?
43. Please provide information about the emerging practice of omics and how this field of healthcare is regulated in Canada.
44. Does Staphylococcus play any role in SARS-CoV2 infection or Covid-19?
45. Does Streptococcus play any role in SARS-CoV2 infection or Covid-19?
46. mRNA export is apparently blocked or otherwise inhibited by ORF10. As we know, ORF10 protein, unnecessary to the survival of the SARS-CoV2 virion, subsequently associated with herpes proteins, is allegedly a part of the SARS-CoV2 genome. Are there any studies or therapies underway to address how and why ORF10 became attached to the SARS-CoV2 genome?
47. What potential or known roles do ORF10 and the other SARS-CoV2 open reading frames play in association with herpes proteins in those who have contracted SARS-CoV2 infection and/or the resulting coronavirus disease?
48. Has the SARS-CoV-2 genome been designed, redesigned or otherwise manipulated in any way?
49. Bill Gates is warning of another potential pandemic owing to malaria. Epstein-Barr proteins and Malaria proteins can act adversely when interacting together. What is Health Canada doing in response to this potential future crisis?
50. What long-term effect on human health and the ecosystem is anticipated with wolbachia-infected mosquitoes?
51. Does Health Canada or any other health agency in Canada perform any research similar to that of the American Human Genome Project?
52. Is Health Canada employing measures to address the increasing numbers of autoimmune and metabolic disorders among the populace in Canada?
53. Do Herpes, Epstein-Barr, SARS-CoV2, and other varied proteins cross the placenta?
54. If the last couple of generations and the next generation yet to be born are infected with varied proteins that cross the placenta, then vertical transmission is occurring and, now, with varied proteins continuing to affect the human biome, horizontal transmission is occurring in real time. Is trans-generational immune priming, then, a concern to Health Canada?

55. How have fertility rates in Canada been affected by the current health crisis known as the Covid-19 pandemic?
56. Scientists and researchers are currently experimenting with various proteins. We know that protein *errors* can cause serious, adverse consequences for the entire human population, as evidenced by the mad cow epidemic. What measures are employed by the medical community to prevent protein mishaps with current gene therapy applications?
57. Are the people of Canada potentially at risk of prion disease as a result of SARS-CoV2 vaccination and/or other gene therapy applications?
58. Is it correct to say that luciferin converted to luciferase produces a near heatless light within the human biome?
59. Do particular elements, such as herpes proteins, assist with the expression of luciferase?
60. What is known about the static latency of the herpes genome?
61. Why do medical professionals frequently misdiagnose herpes, syphilis and leprosy as one for the other?
62. Are the historical syphilis experiments, which are now recognized as crimes against humanity, related to the evolution of herpes proteins that have come to be employed in current medical applications?
63. What is the estimated annual volume of nanomaterials produced in or imported into Canada?
64. Is nanotechnology employed in public food and/or water systems?
65. Are nanomaterials absorbed transdermally?
66. We know that the people in Canada are subject to nanoparticles in the open environment whereby the government monitors and measures PM2.5 levels as a safety protocol. What are these various particulates and how are they affecting human health?
67. Do various personal care products such as sunscreen and hand-sanitizer contain nanomaterials?
68. Does Health Canada require product labeling in Canada to identify products containing nanotechnology? Why or why not?
69. Does Health Canada consider GANS plasmas and the resulting amino acids in response to individuals infected with SARS-CoV2 proteins?
70. Dr. Kary Mullis, inventor of the PCR test stated that PCR should not be used as a primary diagnostic tool. What is Health Canada's position on the PCR test in relation to SARS-CoV2 and Covid-19?
71. Does the SARS-CoV2 vaccine prime the immune system?
72. What purpose do gold nanorods serve in the medical response to SARS-CoV2 protein infections and the resulting disease referred to as Covid-19?

73. Are nanorods or other nanotechnologies required to be in the human biome to establish medical biotechnical interface applications?
74. Are there any known health maladies due to inhaled nanotubes, nanowires, etc., and subsequent breathing problems in humans?
75. Where can I find resources indicating the proven long-term safety of graphene in the human biome?
76. We know that graphene is magnetic and electrically conductive. How is conductivity and magnetism affected when graphene enters human and animal biomes?
77. Optogenetics allows medical practitioners to remotely switch neurons on and off as desired. We further know that Chemogenetics allows for engineered proteins to target specific cell types. We've further come to understand that a genetically modified protein known as magneto has the ability to remotely control the brain. Are these practices currently condoned and approved by Health Canada?
78. We know that the American CIA, working with the Canadian healthcare system, has been enabled to torture Canadians through the MK Ultra mind control program. Is the CIA or any other intelligence agency currently active within any sphere of the Canadian healthcare system?
79. In the United States, an organization known as DARPA is involved with American medical research and technological advances for alleged national defense. Canada formed an organization, allegedly modeled after DARPA, known as CARPA. Does DARPA or CARPA have any involvement in the Canadian healthcare system?
80. How is Health Canada regulating brain-computer interface technologies and human applications?
81. What available information does Health Canada have regarding the long-term safety and efficacy of brain-computer interfaces?
82. Does Health Canada have any information available about the psychology and mental health effects of trans-humanism and other potential bioelectric applications?
83. Practical neuroscience applications have been weaponized. What is Health Canada doing to safeguard the people of Canada from extremely invasive biotechnology applications?
84. Does Health Canada have any information about the Soul-Catcher program, promoted by members of the IEEE, such as Dr. Katina Michael who is, seemingly, aligned with the U.N's sustainable development goals?
85. Dr. James Giordano has spoken to the issue of potential mind control applications being used against potential targeted individuals. Is Health Canada aware of any government operation or NGO organization directing any sort of

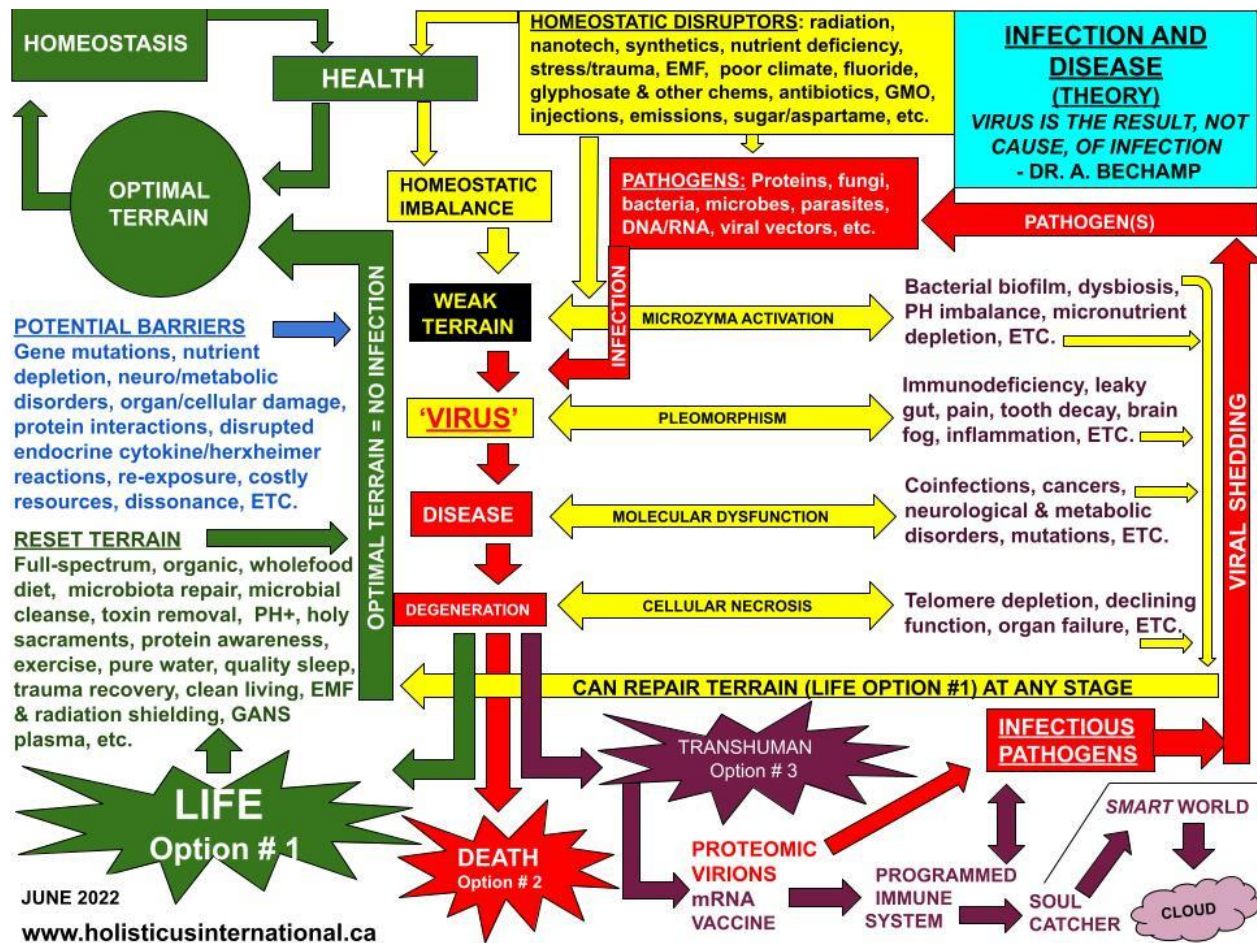

electromagnetic applications, in any way, against any individual or group of individuals in Canada?

86. Does Health Canada have any information available about the anticipated effects that the smart-grid and smart-cities will potentially have on long-term animal well-being and human physical, mental/emotional and spiritual health?
87. Are meta optics applications, or similar technology, authorized for use in Canada by Health Canada?
88. Is the ID2020 program employed, in any way, by medical professionals in Canada?
89. Can the condition of the human body be considered to be in optimal condition once therapeutic toxins are injected into it?
90. Do vaccinated individuals shed and/or otherwise expel exosomes containing SARS-CoV-2 proteins into the open environment?
91. Can unvaccinated individuals with compromised biological terrains become infected by the viral shedding of SARS-CoV2 vaccinated individuals?
92. When does Health Canada intend to officially inform the people of Canada and subsequently obtain consent from Canadians about the trans-human agenda, the impending smart world and the United Nations Agenda for sustainability?
93. What is the medical condition known as Morgellons? Many people have symptoms of Morgellons but find themselves medically oppressed upon efforts to seek a diagnosis and subsequent treatment. What is known about Morgellons and how can I access more information about it?
94. Does bacteria morph into yeast and subsequently into fungus as disease progresses?
95. Have there been any cases of black fungus found in SARS-CoV2 infected patients in Canada?
96. Many of my former clients were prescribed methadone and benzodiazepine medications, simultaneously, which I understand to be a dangerous practice. Can methadone patients safely take benzodiazepine medication?
97. How are methadone clinics regulated and held accountable by the healthcare system in Canada?
98. What services is Health Canada providing in response to the unprecedented oral healthcare crisis in Canada where many people are suffering in the absence of viable solutions to dental pain, infection and a myriad of resulting health and mental health issues?
99. How many prisoners in the Canadian penal system died in custody, allegedly due to SARS-CoV2, since the alleged pandemic began?
100. Testosterone depletion is affecting several men in Canada. Is Health Canada responding to this potential crisis in any way?

101. The endocrine system has been disrupted in many animals and human individuals in Canada. How is Health Canada responding to this actual crisis?
102. Health officials estimate that 90-95% of the population harbors Epstein-Barr proteins. How did such a high rate of infection occur and why isn't that being communicated to the Canadian public?
103. With so many various proteins interacting in respective individuals, is it safe to vaccinate every person in the Canadian populace without a medical assessment first?
104. We know that glyphosate mimics glycine, a fundamental building block of life. We further know that humans are often exposed to various sources of glyphosate. What effect has glyphosate had on overall human health since it was first approved for use in Canada?
105. What short and long term effects does aspartame have on human health?
106. The government of Canada and Canadian health officials are literally forcing the people of Canada to be medically assaulted and, in far too many cases, injured or murdered by the epic mismanagement of the alleged pandemic. How can Health Canada possibly continue to justify the administration of SARS-CoV2 vaccinations to the Canadian populace, especially in light of so many post-vaccination injuries and deaths?
107. How does Health Canada justify the injection of toxins into individuals who were healthy prior to receiving a mandated vaccine?
108. Medical research indicates that it is imperative for SARS-CoV2 vaccinated individuals to detoxify the body from toxins that were injected into them through the SARS-CoV2 vaccine. What does Health Canada recommend for a swift, safe and effective detox process?
109. A Walmart executive recently spoke to the issue of the metaverse in a recent interview. This particular executive stated that Walmart was preparing to enter into the metaverse as Walmart continues to expand its services. What known potential health effects are associated with this new metaverse and how will health effects be monitored and regulated as the metaverse continues to unfold into this current reality?
110. Cleaning up the biological terrain through lifestyle improvements to provide an optimal homeostasis and subsequently preventing toxic invasions are two, obvious, critical factors for overall good health and disease prevention. It is evident that lockdown orders have forced poor diets and lifestyle choices. Vaccine mandates have forced the injection of toxins such as foreign DNA and nanotechnology into the human biome. How does Health Canada justify such measures?
111. Many people in Canada do not have regular access to a family physician and many who do receive bad or conflicting advice. Guidelines surrounding

medicines and supplements, proper dosing and safe-use instructions are scattered and confusing. What, then, are the recommendations of Health Canada for individuals to access cohesive, general information and accurate updates about medicines, supplements and individual options for various treatments and preventions, especially for the SARS-CoV2 protein infection and the resulting disease referred to as Covid-19?

112. In response to the Crown Empire corrupting all that's good in Canada, I'll be executing several initiatives within my own community. One of these initiatives is to start a grassroots peer support clinic for general health, oral health and mental health supports. Although I am a certified medical office assistant, I'm certainly not a health expert nor am I licensed or otherwise regulated. What advice does Health Canada have for me to act in such a capacity?
113. Does Health Canada have any recommendations on how to safely and effectively baptize and to subsequently execute the rituals of the holy sacraments that are currently being obscured and otherwise controlled by religious authorities?
114. Does Health Canada have any information regarding the spiritual resurrection of the body and whether the resurrection occurs in an individual's lifetime (born again) or after their death?
115. Individuals have the literal ability to overcome the material world and, thereby, death itself. The kingdom of heaven is at hand and it is within each and every individual despite their nationality, race, age, gender or religion. Does Health Canada take a position on this particular statement?
116. I've attached, immediately below, a flowchart that I designed. I'm seeking review, should any employee of the Canadian healthcare portfolio be inclined to provide such. Many medical professionals are outright confused between terrain, germ and other theories and it's time that everyone in Canada who is interested in good health and well-being gets on the same page to restore good health in Canada. I'm using the flowchart as a starting point to understand the process of disease in the human body. I understand that my interpretations are likely to be heretical and against the grain of established medical opinions, however, science is always evolving and the allegedly scientific minds at Health Canada must evolve with it to have any continued validity as a public health authority in Canada, whatsoever!

I regret that my queries are so many, however, each question is valid and the answers are pertinent to the health and safety of myself, my loved ones and every other person in Canada. Although I do have several other questions, I'll leave it at that for now so that I'm not accused of being vexatious or frivolous in my attempts to get solid answers to serious questions. I'm being very genuine about these inquiries and, thus, I insist that I be treated as such by Canadian public health officials.

In my opinion, crimes against humanity and genocide are, without doubt, occurring, in real time, on Canadian soil, against the people of Canada. The people of Canada must resist the foreign Crown Empire regime if they are to preserve their own life, liberty and security.

The Military Provost Marshall, the Judge Advocate General, the Directorate of Special Examinations and Inquiries for the Department of National Defense, Canada's Integrity

Commissioner, Canada's Premiers, and the Federation of Canadian Municipalities have all been informed of the active treason in Canada.

I've subsequently issued public notices, encouraging others to take up initiatives to take back their communities by calling Crown agents, such as Freemasons, out of local respective municipal governments. From the Masonic side of things, it's unlawful to influence municipal officers. From the public servant perspective, it's unlawful to serve the public with a glaring conflict of interest. The people of Canada must enforce the laws of land and remove double Crown agents from the government in Canada. Further evidence can be found on my website, the link is provided below.

Further, I've submitted an application to the Ontario Human Rights Tribunal in response to incredible corruption within Canada's judiciary and law society that enables and facilitates the criminal child protection system to operate in Canada. The Crown Empire regime has been, and continues to, prey on Canadian children and their families.

Over the past decade, I've submitted, to no actual avail, several grievances to various organizations about the abuse and outright murder of the elder population and how various healthcare professionals, police and lawyers in Canada facilitate such.

The Crown Empire violates prisoner rights, general human rights, environmental rights and animal rights, too. The abuses of the Crown Empire are nearly indiscriminate and never ending and about to get far worse with an impending religious global order.

A food shortage, more alleged pandemics and the effects of the currently staged pandemic are looming in Canada. We know that Ontario was just hit with an unprecedented weather anomaly during planting season and that weather modification weaponry has been affecting farmers for some time now.

We know that conglomerates control Canada's transportation systems for imports and exports. We are further aware that conglomerates are usurping, and sometimes even tainting, the water supplies in Canada. The people of Canada must remain vigilant against attacks on Canada's water or food supply systems while subsequently resisting GMO garbage crops.

In addition to the mainstream healthcare system, even many alternative healthcare services in Canada are rather exclusive and, all too often, inaccessible for many people who require the service. One has to understand that oppressed, poor people go somewhere when they run out of options for their health, safety and liberty and those

people usually end up finding people like me who have minimal training and ability to advocate their needs.

Therefore, at this time, people like me, who minister to the invisible, suffering population of society, are simply trying to educate ourselves to be sure that we aren't doing any harm to those who seek us out for assistance when all else fails in their lives.

The people of Canada must mobilize in respective communities, to protect farmers and to set up their own markets. They must subsequently set up community clinics for healthcare purposes and recruit skilled healthcare workers to operate them.

The laws of equity must be learned and applied by the people of Canada. The Crown Empire has deceived the people of Canada and, thus, any and all contracts, including debt, made between the people of Canada and the Crown Empire are immediately nullified and forever void.

The problem that we have with the elected and appointed officials in Canada is elitism. Many of these so-called leaders come from 'nobility' and particular bloodlines. We can find various factions of the elite operating through all sorts of exclusive clubs, such as the International Imperial Court System, the Empire Club of Canada, heraldry associations, genealogy groups, dynastic, fraternal, military, state and religious orders of merit, nobility, chivalry, ecclesiastics, etcetera.

These elite factions war among themselves, solving family dramatics through political systems. These various factions wage war on the unsuspecting people of the world to suit their own agendas. The various warring factions of the elite collude, silently, for the most part, to preserve their hidden, elite status. The elite believe that they have special blood and, thus, a divine right to rule. The people of Canada must see this upper, nearly invisible layer of society and call it to account.

Communities must align to protect the individuals and families within them. Masonic police officers, and other agents of the Crown, must be held to account at all stages of this Canadian revolution. Once the people of Canada take back their municipal governments, more and more services can and will develop at the local levels, as opposed to federal or global levels, and the people of Canada can begin to rebuild their lives and provide a safe and healthy environment for the current and future generations to thrive in.

More information on community initiatives can be found on the Holisticus International website. All documents from that website are preserved. If the website goes down, a

new one will inevitably launch. If necessary, others can seek out the information that I'm attempting to publicly share through various search engines.

As a targeted individual who has been trying to expose this epic corruption in Canada, I highly doubt that launching this campaign will be seamless and problem free. Still, I'll always try to communicate the issues that I'm exposing to a wider community despite how much oppression I may experience. My genuine personal motivator at this time is to facilitate avenues for the people of Canada to know about, and to subsequently liberate themselves from, the thoroughly corrupt and tyrannical Crown regime, especially before it becomes too late for the people of Canada to effectively act against it.

The nation of Canada and its people are in peril! Health Canada has a duty to act!

I look forward to a response but, in all reality, I don't really expect such. The government of Canada has a terrible habit of sitting in silence when caught red-handed. Still, silence speaks volumes should that be the chosen response of Health Canada.

Thanks in advance for the time and effort directed at the queries herein.

Sincerely,
Brenda Everall
